This multidisciplinary aged care seminar will provide an insight into the problems faced in managing chronic diseases in the increasing aged population. Presentations will investigate opportunities for working better together, to meet the health care needs of older people in Western Australia.

Expert speakers include Dr David Blacker, Deirdre Criddle, Dr Robert Paul and Dr Barry Vieira.

**UWA CPD Health is open to all members of the multidisciplinary health care team.** Multidisciplinary working and referral pathways are key to quality patient care and outcomes. Continuing education events are an ideal platform to bring the professions together and provide opportunities for interdisciplinary care planning, networking and referral pathway co-ordination.

**Topics include:**
- Parkinson’s disease
- Dementia
- Osteoporosis and falls risk management
- TIAs and Stroke
- Incontinence
- Age-related macular degeneration
- Geriatric medication considerations

Organised by UWA in collaboration with the Aged Care Network and Medicare Local
